## Resumo

---

Full-Stack Developer focused on Python and Django, with practical experience in developing AI-powered web and mobile applications and cloud deployment (AWS). Knowledgeable in Software Engineering, Type/JavaScript, Node, Java, C, HTML/CSS, Vue, Tailwind, PHP (Symfony and Laravel), Docker, and databases such as PostgreSQL. Familiar with agile methodologies, especially SCRUM, CI/CD tools (GitHub Actions), Nginx, and RESTful APIs.

Proactive and problem-solving focused professional with strong teamwork skills and the ability to use GIT for code versioning. I constantly seek to improve my technical and interpersonal skills to add value to projects and deliver robust, high-performance solutions.

## Professional Experience

---

### Systems Developer
